

SERGIO E. BLANCO ORDOÑEZ

FULL-STACK DEVELOPER

ABOUT

I am a full stack developer at HENRY with experience in front-end and back-end apps development. My goal is to join a dynamic and growing company where I can expand my skills in the IT area. I am a person passionate about learning with great ability to work in a team and adapt to different contexts.

EXPERIENCE

SmartBooking

2023

This project is a hotel reservation application, it uses a MERN Stack (MongoDB, Express, React and Node.JS)

- For the administrator profile, the application allows creating a new hotel, assigning rooms to the hotel, modifying room values and hotel data, enabling or disabling hotels and rooms, and viewing reservations made in the hotels. Each room allows registering the base cost, taxes, and room type.
- For the user profile, the application allows searching for accommodations by date of entry, date of departure, number of people staying, and city of destination. The user can fill out a reservation form with their data and reserve a room. The application also sends an email notification to confirm the reservation.

OrionMusicX

Henry | 2023

OrionMusicX is a group project, it is an e-commerce page that offers musical beats, this app is made with Firebase, Bootstrap, React and javascript.

This app has:

- login
- authentication with google
- User and administrator profile each with its functions
- combined filters
- Shopping cart with PayPal
- listen to previews of the beats
- Like and dislike button
- Deploy: OriOn MusicX (orion-proyect.web.app)

PI-COUNTRIES-APP

Henry | 2022

This application allows you to see information from different countries using the external restcountries api and from it you can, among other things:

- Search countries
- Filter / Sort them
- Create activities

Rick_and-Morty_app

Henry | 2022

This app was built with React, javascript and css, consumes to the Rick and Morty API, in addition to this it has functions like:

- login
- Search bar
- Filters
- Like button
- Deploy: Rick-and-Morty-App

Weather-app

Henry | 2022

This project it's a applica that consumes <https://openweathermap.org/api> API to provide information of the weather in the city that you're looking for in real time.

It's all React whith JavaScript, HTML and CSS, and SweetAlerts when there's no coincidence between what you're searching and the API data.
